MEAT AND POULTRY

- Labels for Difficult Application and Storage Challenges
- Transparent Label Material to Provide a Look of Freshness
- Bright, Vibrant Labels that Encourage Product Purchase
- Solutions for Extreme Processing Conditions

Pressure Sensitive Labels for Your Meat and Poultry Applications

Label Technology supplies meat and poultry producers with pressure sensitive labels for a variety of applications including prime, weigh-price, and box-end labels. Whether the use is to decorate your product or simply identify the contents of a box, Label Technology applies the same speed, quality, and care to each label.

Meat and poultry labels are challenging because they undergo cold temperature conditions or moisture contact during application and storage. The package itself may be an irregular shape requiring a label to conform to a difficult surface. Our background in this market means we have the knowledgebase of what works best. Our precision die cutting methods ensure your production lines are not stopped due to deep cuts or poor registrations. And all of our meat and poultry label adhesives meet FDA regulations for indirect food contact.

Do you have a new application that a standard pressure sensitive product may not meet? Not a problem, our R & D team will work with you to define the optimal solution for your difficult application.

- Up to 10 Colors
- State-of-the-art Flexographic Printing
- Up to 200 lpi
- Large Inventory of Facestocks, Liners, Adhesives, and Inks
- Constructions to Withstand Blast Freezing or High Pressure Pasteurization Processes
- Automated Color Catching
- Pantone, Toyo, and Custom Matching
- Rotary Screen Printing
- Matte or Gloss Laminations
- Matte, Satin, Imprintable or Gloss UV and Water-based Coatings
- Rolled, Sheeted or Fanfold
- Hundreds of Different Die Sizes and Shapes
- Adhesive Printing
- In-House Digital Graphics and Prepress
- Quick turnaround
